Fine Art Registry® Artist of the Month

Phillip Anthony

Phillip Anthony is currently positioned as the event horizon artist of fractal imagery.

A consummate student of the ancient disciplines of sacred geometry, Phillip Anthony's core sense of detail, composition and design is further complemented by his choice of the digital medium. From his studies in into the conscious and unconscious manipulation of energies, Phillip presents the profound inner workings of this sublime world in "Fractalscapes".

Phillip chose fractal imagery as the medium to convey his interpretation of this world. Feel the pulse as Phillip represents energies in shapes that transfix and transpose with colors that ride the edge of the spectrum. Each image a window beautifully expressing degrees of energy from the subtle to the profound.
